Junior Web Developer | JavaScript | HTML/CSS | AI-Assisted Development

Junior Web Developer with a foundation in JavaScript, HTML/CSS, Python, responsive web design, and AI-assisted development. Experienced in creating accessible user experiences, conducting software testing, and collaborating in Agile environments. Passionate about modern frontend technologies, AI-powered development workflows, and building fast, intuitive web experiences while continuously learning new tools and frameworks

Skills & Competencies

Web Development: HTML5, CSS3, JavaScript, Responsive Web Design, Web Accessibility (WCAG), React, TypeScript

Programming & Tools: Python, Java, C++, Git, GitHub, Linux/Ubuntu

QA & Testing: Selenium WebDriver, Playwright, Manual Testing, Functional Testing, Regression Testing, Test Case Design, User Acceptance Testing (UAT), Defect Tracking (JIRA), Agile/Scrum, SDLC

Cloud, AI & Data: AWS, Docker, SQL, Power BI, Generative AI, Prompt Engineering, GitHub Copilot

Professional Experience

Junior Data Operations Analyst | Weldforce Corporation (Remote), Mississauga Nov 2024 – Present

- **Data Management:** Processed and qualified **50+ weekly inbound student leads** in CRM, ensuring accurate data entry and timely distribution to the sales team
- **Data Quality Assurance:** Audited and cleaned lead database using QA methodologies (deduplication and validation rules), improving overall data accuracy by **20%**
- **Process Optimization:** Developed standardized data-entry and lead-tracking procedures, reducing processing errors by **15%** and improving consistency
- **Reporting:** Generated weekly data quality reports using Excel and CRM analytics to identify trends, monitor data integrity, and support operational decisions

Sales Associate (Customer Support Focus) | Winners (TJX Canada), Ottawa Sep 2024 – Present

- **Issue Replication & Escalation:** Resolved **50+ daily customer inquiries**, replicating transactional issues and escalating system inconsistencies to management for further investigation
- **Operational Accuracy:** Maintained **98% accuracy** in cash handling and inventory cross-checking, applying checklist-based verification methods similar to QA test case execution
- **Cross-Functional Collaboration:** Collaborated with team members to meet daily sales targets while supporting store flow, merchandising standards, and operational consistency

Key Projects

Software Testing – Web Banking Application | QA Engineer

- **Test Automation:** Automated **50+ functional** and regression test cases using Selenium WebDriver and Python, reducing regression testing time by 30%
- **Defect Tracking:** Designed test cases based on functional requirements and documented **40+ defects** in JIRA. Collaborated with developers to reproduce, investigate, and resolve critical software defect
- **Test Documentation:** Prepared test plans, bug reports, and execution summaries in Agile/Scrum
- **Methodology:** Applied Agile/Scrum principles throughout the software development lifecycle (SDLC)

Responsive Web & UX Redesign – Online Student Portal

- **Responsive Design:** Designed responsive web interfaces and high-fidelity prototypes with WCAG-compliant layouts for desktop and mobile users
- **Frontend Optimization:** Improved navigation flow and mobile responsiveness, reducing user friction by 30%
- **Usability Validation:** Conducted usability and A/B testing to improve user experience
- **User-Centered Design:** Incorporated user feedback into iterative design improvements to enhance accessibility and usability

Education & Certifications

Energy Management Postgraduate Certificate | Algonquin College Sep 2024 – Apr 2025

Software QA & Test Engineering | Conestoga College Sep 2023 – Apr 2024

Bachelor of Computer Application | Guru Nanak Dev University May 2019 – Apr 2022

Certifications: AWS Solutions Architect | Android Basics (Kotlin) | Deep Learning (Coursera)
